

Pest Control

The following steps are taken when analysing pest control:

1. Food is daily checked in the fridge for out of date stock and temperature is checked daily every afternoon.
2. Daily cleaning by the staff to ensure all surfaces, cupboards and floors in the club are disinfected and are free from any elements of food or food residue.
3. The club is routinely checked by a senior member of staff at closing time to ensure a high standard of cleanliness.
4. If any rodent or pest is sighted or droppings are recognised the staff will immediately take it to the management/on sight caretaker.
5. Management will then immediately contact

Pest Control Services: 2037409 and request a visit. (Environmental Services)

0114 2930356 Admin Department.

6. We would then fully conform to the recommendations of Pest Control regarding treatment and preventative measures.
